

Subject: LATEST - UNIQUE Design concepts from 'An Englishman in LA'

I have put this flyer together to highlight 'some' of the unique design possibilities that we create over several ceramic or wood tiles. It shows our ability to split **any image** over several pieces **for wall or dining table**.

In this economy one has to be extra creative to get a clients eye to twinkle, I believe we not only have the twinkle but are able to make them sparkle!!

The first two images show the unique tile table runner concept that can use **ANY** artwork (yours or mine) and in the case of the first example I was given a piece of **MATERIAL** to do my 'magic' with! The third shows my signed 'Weeping Angel' created for a show house in Las Vegas (I get to keep the wine). The final example here shows a cross.

The tile table runner is a working piece of art - as each tile can split off to go under a diner's plate!

Example 1: tiles are 10" x 13" - runner measures 20" x 39"

Example 2: tiles are 12" x 12" - runner measures 24" x 36" (Dutch 16th century)

Example 3: WOOD (can cut to any size) measures 33' x 64' and in this case went on a wall. (Cane signed 1994)

Example 4: Cross (tiles can be separate or fixed to a backboard) made up of 6" x 6" tiles, again if these were 12" x 12" tiles, an astonishing table runner... (Italy 14th century)

All tiles are 1/8" thick and felt backed. The wood tiles have varying degrees of thickness up to 3/4" and can be straight edged as in the Angel example or profiled.

prices: 10 x 13 and 12" x 12" tiles are \$40 each tile - Wood tiles depend on size, thickness and edging (or not) vary in price. The Weeping Angel signed piece shown \$450

Finally for the moment let me just say that we have the ability to create anything you wish, what we can't do is stamp MADE IN CHINA on ANYTHING!!

Thank you for your time and please do get in touch if you have any questions.
